

AQUA

AQUA D03

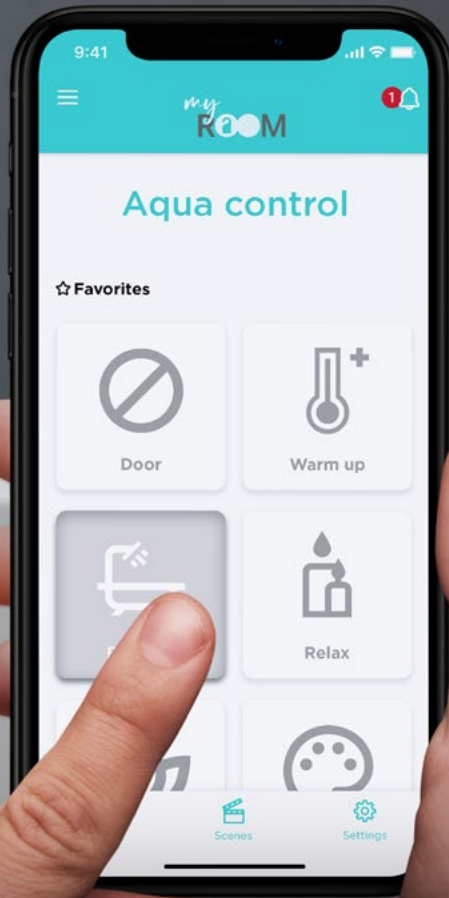

AQUA.

The new smart showers

With the new **smart ROBOTBAS showers** the bathroom becomes part of the entire automation system of the hotel room, providing the guest comfort with functions such as warm up, bathtub or spa filling, and **while optimizing and reducing the consumption of water and energy.**

MyRoom: the ROBOTBAS app

With MyRoom you can customize the functionalities of the **AQUA D03** smart shower.

Functions

WARM UP

Preheat the water to the **desired temperature** before the guest gets in the shower.

FILL THE BATHTUB

Fill the **bathtub**, taking advantage of the initial cold water, until obtaining the pre-established temperature and volume.

SPA

Execute **water sequences** mixing temperature, flow and water outlets.

CHROMOTHERAPY

Enjoy and stimulate sensations with a **therapy** that mix **water and colours**.

RELAX

Create **relaxing ambients** dimming the intensity of the bathroom lighting.

DO NOT DISTURB

Activate the room service '**Do not disturb**' feature **from the shower**.

Some of the advantages of AQUA are:

AMAZING COMFORT

It has a thermostatic system that makes it possible to keep the temperature and the water flow constant throughout the shower, in spite of the pressure variations in the installation.

WATER CONSUMPTION CONTROL

Limits of temperature and water flow can be established, reducing the operating cost and guaranteeing a responsible use of natural resources.

WATER CONSUMPTION RECORD

The ROBOTBAS smart shower integrates cold and hot water meters, allowing to record and analyze the water and energy consumption of each room.

EASY TO INSTALL AND MAINTAIN

The R7000 series has been specially designed to be installed and maintained by staff with no specialized training.

RELIABILITY AND DURABILITY

ROBOTBAS products incorporate widely verified industrial technology that translates into a lower failure rate and an increase in the useful life of the system.

Water smart mixer system AQUA V03

Water smart mixer system with 3 outlets with thermostatic technology, completely electronic. It calculates the exact **proportion of hot and cold water** to obtain the flow and temperature required by the user.

Touch switch LS7544 JLS B

Control from touch switches

The functions of our **AQUA** smart shower can be integrated into the touch switches of the LS990 series, allowing the **various functions to be activated from anywhere in the room**. These touch switches, finished in ultra-resistant glass, with LED backlighting and haptic feedback, are customizable in color, iconography and functionality, and are available in one, two, three, four or six functions.

AQUA system devices

RC7660

The RC7660 is a SiSLink/IP **room control** over Ethernet with SiSLink/C3 bus and a power supply added. This model allows to control 2 fan-coil and 2 radiant floors, 24 on/off light points (all dimable), 16 configurable scenes with support for blinds.

IF7943 AQ

SiLink/C3 bus communication interface

that allows the integration of any AQUA series device with the room's domotic automation system.

This device is compatible with ROBOTBAS R7000 series room controllers.

BI7580

Bluetooth interface for SiLink/C3 bus

with the ability to connect a smart device. It allows you to **control a room using the MyRoom*** application available in AppStore and Play Store.

LD7253

RGB colour dimmer for the SiLink/C3 bus. It has 3 PWM outputs that allow direct dimmerization of LED strips.

* Available in 2021

Installation scheme

Electronic faucet

AQUA P01

Complete your AQUA experience with the **touch switch** with flow and temperature control for 1 outlet mixer box.

AQUA V01

Water smart mixer system

with 1 outlet with thermostatic technology, completely electronic.

It **calculates the exact proportion of hot and cold water** to obtain the flow and temperature required by the user.
